

It's Fun!

Learning about the environment...

Learning about the environment can be fun and rewarding! The links below provide games and activities to learn about environmental health and ways to prevent pollution to protect our planet earth. You can even get ideas for your next Science Fair project! Have fun!

Parents and teachers: What is hazardous waste? Instruction guide for 7th-12th graders.

Remember, please ask your parent or guardian before visiting any website, and especially before providing any information via the Internet or by e-mail. If you have any difficulties or concerns with any linked materials, please let us know. Contact our Pollution Prevention Specialist by email: [Ellen Schulte](#)

Eco-Shopper

Be an eco-shopper, you can be one like me.

You can make a difference if you shop wisely.

Eco-shoppers watch what they buy. Learn environmental shopping – give it a try!

Choose items with minimal packaging – choose the larger size. Choose items that are refillable, with toxic substances, minimize! Buy longer lasting batteries, buy items you can reuse. Buy recycled products – it's easy for you to choose.

When you buy recycled products tell the store "Thank You." Storeowners like knowing it's what you want them to do. You can learn to shop wisely, and others you can teach. But what's most important, practice what you preach!

Eco-shop!

Your Pledge To The Environment

"I will do my part to protect planet Earth.

I will make an effort to educate myself and others about recycling and the environment.

I will lend a hand to the environment by reducing, reusing, recycling, buying recycled products, conserving energy and water and protecting my air and water.

In this way I will be making every day Earth Day."

Be Safe!

Keep Away From Toxics!

➤ Prevent poisonings by keeping toxics in locked areas away from young children and pets
